ŠKODA

EASI'R Now

Communication package

For dealerships that especially want to focus on enhancing customer experience

Outbound calls

Make phone calls and log the calls automatically with no need to change phone numbers. You can also keep the phones you use today.

Inbound calls

Receive, log and track inbound calls, from any lead source - such as online marketplaces, dealer websites or advertising campaigns, automatically.

Messages coming soon

Send messages directly from EASI'R now to log conversations automatically and register the messages on cases.

Outbound calls

Call any lead or customer with a single click

Make calls right from within EASI'R Now, by connecting your existing mobile or desk phone, without even changing the way you work, your phone or numbers.

Call any lead or customer with a single click to automatically record and log outbound call activities, the duration and if the call got connected or if it ended unanswered, while still keeping your personal calls personal.

Take notes during and after calls are made and log case progress and plan your follow-up strategies in one seamless workflow, right from within EASI'R Now.

Get valuable insight into inbound call traffic

See instantly who is calling and from which lead source the call originates, and automatically route inbound calls to the right team or user. During the call, users can easily create a new sales opportunity or update an ongoing sales case automatically.

Receive phone calls, from any lead source - such as online marketplaces, dealer websites or advertising campaigns and log them automatically as new lead requests in EASI'R Now. Any missed calls are also logged automatically and generate callback tasks, so no one gets lost.

Get valuable insight into inbound call traffic from any lead source by tracking the quantity and quality of calls and their respective likelihood to turn into test-drives and eventually sales. This helps you to allocate your marketing budget to the lead sources most profitable to you.
