

Job opening

Technical Business Analyst for our Integration team

Full time position at the Aarhus location

We are looking for a service-minded and self-driven full-time Technical Business Analyst to our Aarhus office. You are able to build and create technical concepts based on the clients' needs and requests and to deliver it to our technical team for implementation. You will be responsible for driving the process from concept start to the final implementation including making the last quality tests.

Your profile:

You are a proactive individual who is not afraid to take initiative and who can drive their own projects. Preferable you have 2-3 years of experience within the technical industry, and you are curious and have a technical aptitude – eager to quickly learn and implement new technologies. A great team worker who is able to work in both a small and a larger team is key.

Our office language is English and you need to be able to communicate on a high level both in writing and verbally - Danish is a plus, but not a requirement.

What you'll do:

- Build general concept ideas for client integrations including the creation of specifications for customer integrations based on business requirements. Create requirements and development tickets for the technical team and handle any necessary configurations.
- Coordinate projects, which includes registration, coordination and monitoring of project specific tasks in association with the rest of the integration team.
- Support the Sales Team by researching, reviewing, coordinating and follow-up on incoming sales related leads and inquiries, in coordination with the sales department
- Travelling
 - The role requires some travelling
- Reporting
 - The employee reports directly to our COO

What we offer:

- An exciting and dynamic workplace with a flat hierarchy in a growing and changing market where your ideas and input are valued.
- Plenty of challenges as part of a constantly evolving digital market. We are highly innovative and on a fast growth journey.
- Professional colleagues and an open, informal and multinational working environment, where we work closely together to reach the goals.
- Latest hardware, also for private use.
- Tasty and healthy catered lunch everyday plus free soft drinks and snacks.
- High level of responsibility and excellent career opportunities.
- Social events like Friday bar, company events and more.
- Work-Life-Balance.
- Competitive salary.

Who are we?

EASIR is a digital-born international software house with offices in Aarhus (DK) and Chemnitz (D). Our international team develops a cloud-based SaaS business software for the automotive industry. Amongst our clients are influential brands like Škoda, BMW and Jaguar Land Rover.

EASIR is a well-established IT company that has kept a modern and profound start-up mentality as its key philosophy. That is why we put a high value on self-governance of the team. We also ensure team democracy when it comes to tools and processes, and we are always applying the latest technology. Our employees come from all over Europe, and our company language is English. Danish skills are an advance, but not a must to work at EASIR.
